

CCS Galaxy Flake Flooring System

Make an impact with a CCS Galaxy Flake Floor and transform plain concrete into a stylish, attractive and durable surface ideal for a variety of purposes.

Easy to clean and maintain, CCS Galaxy Flake Flooring is a cost-effective solution providing a seamless and textured surface with many desirable features and benefits.

Advantages of a CCS Galaxy Flake Floor

Durable – provides superior chemical and abrasion resistance

Decorative – custom colours to enhance and complement the environment

Economical – a cost effective option when compared to pre-engineered flooring

Safe – provides a textured surface that increases slip resistance

Seamless – provides a wall to wall seamless surface that won't collect dirt, moisture or germs

Low Sound – the seamless and flexible surface deadens the noise of foot traffic and carts

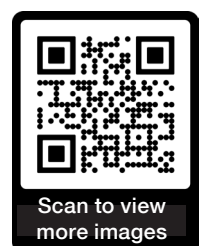

Renewable – can be rejuvenated after years of use by sanding and resealing the surface

About the CCS Galaxy Flake Flooring system

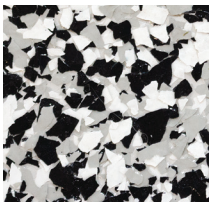

Designed with flexibility and durability in mind, the system consists of decorative acrylic flakes embedded between a tinted base coat and clear topcoat.

You can choose the density, type and colours of the flake so your floor is personalised to best suit your needs, whether that be a standard flake floor or a floor with the aesthetics of natural stone.

CCS Galaxy Flake Standard Colours

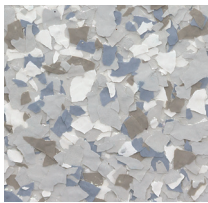

Suitable for a range of applications, the standard CCS Galaxy Flake range features a selection of tones to suit the colour palette of every space.

Galaxy Domino

CCS Natural Granite Stone Flake Colours

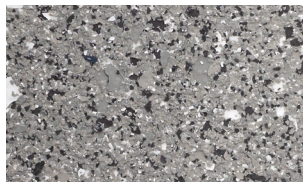

CCS Natural Granite Stone Flake is an on-trend and distinctive flake providing the appearance of a chic polished granite stone floor. This product affords a high end look that will be the envy of those who see it whilst still delivering all the benefits of a traditional flake floor. CCS Natural Granite Stone Flake is a great choice for those wanting natural stone flooring without the usual associated high costs.

Mineral Stone

Planet Stone

Onyx Stone

Carbon Stone

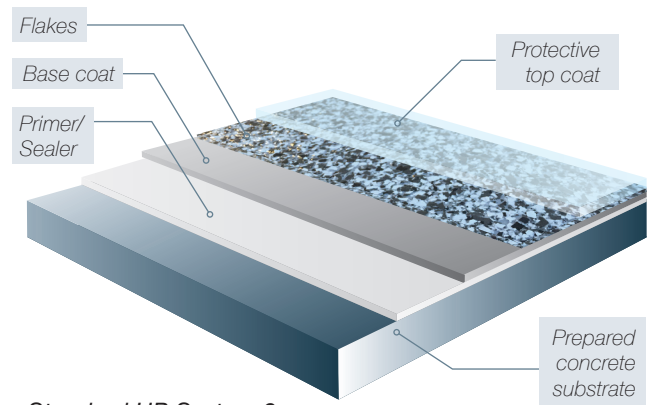

Creating a CCS Galaxy Flake Floor

A CCS Galaxy Flake Floor is robust and made to last. It is produced by applying a carefully developed system of specially designed compounds resulting in an attractive, hardwearing and dependable surface.

The first step in the process is to carefully prepare the substrate to ensure the correct bonding of products to the surface. The application of a moisture blocking primer sealer is then followed by a heavy-duty tinted base coating into which the flakes are broadcast to the desired appearance and texture.

Once completely dry, the excess flake is removed and a long-lasting and resilient clear topcoat is applied.

Standard HB System 2

Bespoke CCS Galaxy Flake Floors

A CCS Galaxy Flake Floor can be tailor made to meet specific requirements for each project so that various factors such as environmental requirements, appearance, texture and gloss level can be achieved.

The colours and finishes of products featured in CCS brochures are as close to the CCS range as our printing processes allow. Different camera angles and lighting can sometimes distort actual size and distances. We recommend checking your chosen colour against a sample of the product before purchasing as light variation and limitations of the printing process will affect colour tones. Concrete Colour Systems is a division of River Sands Pty Ltd.
