Better Colours and Coatings

CCS uses computer generated imagery (CGI) to provide graphical representations of our products where actual photos are not available. The colours and finishes of the products featured within all CCS imagery are as close to the CCS range as CGI, photographic lighting and our printing processes allow. Different camera angles, although not designed to be misleading, can sometimes distort actual size and distances. We recommend checking your chosen colour against a sample of the product before purchasing as varying light conditions and limitations of the printing process affect colour tones. CCS are marketed and distributed by River Sands Pty Ltd ABN 41 009 919 215, trading as Concrete Colour Systems.
