

# CCS HD DEGREASER

## DESCRIPTION

CCS HD Degreaser is a concentrated, heavy duty cleaner formulated to quickly emulsify, lift, and remove contaminants such as dirt, oil, fat and grease from concrete, stone and tile surfaces.

CCS HD Degreaser is suitable for cleaning both domestic and commercial environments and can be used to prepare the surface prior to application of CCS decorative concrete products such as the CCS Galaxy Coating System, CCS Acrylic Sealers and the CCS Stylepave Resurfacing System.

## PACKAGING

CCS HD Degreaser is available in 20 litre drums.

## APPLICATION METHOD

CCS HD Degreaser should never be used in its concentrated form. Recommended dilution rates are as follows:

Contaminant	Cleaner : Water
Oil/Grease	1 part : 2 parts
Degreaser (driveways & workshops)	1 part : 5 parts
General purpose	1 part : 10 parts
New coloured concrete	1 part : 20 parts

- 1 Lightly wet the surface prior to commencing any application of HD Degreaser.
- 2 CCS HD Degreaser can be applied using a low pressure nap sack type sprayer or an industrial mop. Allow solution to sit on the surface for 5–10 minutes to breakdown the contaminants.
- 3 Scrub the surface using a scrubbing brush, stiff bristle broom, or auto scrubbing machine with a nylon pad. Ensure the cleaning equipment used will not scratch or chip the surface.
- 4 Rinse the surface using a commercial high pressure water blaster or an auto scrubbing machine and clean water.

- 5 Remove cleaner residue from the surface using a wet/dry vacuum or dry mop. Allow surface to dry.

## STORAGE

Store away from other chemicals such as Class 5 oxidizers (i.e. granular chlorine).

For further information consult the Safety Data Sheet and read the product label carefully before use.

Safety Data Sheets are available from [www.concretecoloursystems.com.au](http://www.concretecoloursystems.com.au) or by calling 1800 077 744.

## User Responsibility-Product Selection and Compatibility

CCS warrant that their manufactured product is free from defects as well as being suitable for the purpose for which it is intended as long as it has been used and applied in accordance with the most current Technical Data Sheet from CCS.

In practice, differences in materials, substrates and actual site conditions require an assessment of product suitability for the intended purpose.

The user is responsible for checking the suitability of products for their intended purpose.

Further, combinations of products that form a total system are often required to service particular applications. Due to the multitude of products available to service an application, only products from the CCS system of products must be used in combination with this product to ensure it will be suitable for the purpose for which it is intended.

The product must also not be mixed or used in combination with any other product which is not a product supplied by CCS.

### PLEASE NOTE

The information given in this data sheet is based on our current knowledge of the product when properly stored, handled and applied. We cannot guarantee that the product will be suitable, effective or safe when used for any purpose other than its stated uses.

To the extent that it is lawful, we exclude warranties implied by law and limit our liability to the cost of replacing the product. We accept no responsibility for loss or injury caused by improper use, inadequate preparation, inexpert or negligent application, or ordinary wear and tear.

Service or advice given by our staff should not amount to responsibility for the project - since the owner, or their contractor (and not River Sands), is responsible for procedures relating to the application of the product.
