- 14 popular Australian Standard colours
- Easy to use formulation - simply blend, mix and apply
- Ideal for residential and commercial projects

Epoxy Colour Range

Australian Safety Floor Demarcation Colours

CCS Epoxy Colours are highly concentrated tints that display excellent opaqueness, colour fastness and intensity. Please note that the perceived colour accuracy of any applied system is subject to a number of variables. These include but are not limited to substrate porosity, shade, lighting, colour, application method and film weight. Additionally, there are differences between coating types in terms of colour, gloss, and surface penetration. The above colours are representations and a swatch or sample should be viewed prior to commencement.
